The All in One AI page, tab by tab: History, Buy credits, Models, Playground, Agents and Plan

All in One AI Created on **November 26, 2026** 2 min read

In short: the **All in One AI** page in Meu MozOut is where you see your credit balance, buy more, try the models and manage your agents and your plan. It has six tabs. Here is what each one does.

Tab	What it is for
History	Every AI request, with the date, model, key and credits spent. Filter by date, type, model, key and mode (Sandbox or Production), open the details of any request and export to CSV.
Buy credits	Buying credits, with the volume tiers, plus the list of your top-ups and unpaid invoices.
Models	Every text, image, video and audio model, with its price in credits. Search by name or id and copy the id to use in the API.
Playground	Try chat and image generation before you use the API, with the cost shown before you send. Your conversations are kept under "Conversations".
Agents	Build assistants with your own instructions, knowledge and tools, try them and copy their id to use them through the API.
Plan	Subscribe to the Coding Plan, see the points left for the week and the month, and choose whether to carry on with credits when the points run out.

At the bottom of History

The **Connected apps** block lists the apps you have authorised to use All in One AI through the MCP server, such as ChatGPT or Claude Code, with the date you authorised each one and when it was last used. **Revoke access** stops that app from using AI on your account straight away. See **the MCP page** in the documentation.

Further down is **Deactivate All in One AI**. See **what happens when you deactivate it**.

Contacting us about a request?

Open its details in History and copy the Correlation ID. It lets us find the request first time.

RECOMMENDED

Open the page to see your balance and your history.

Open All in One AI →
