The Models tab: searching for a model and copying its id

Playground & Text Models Created on **November 28, 2026** 2 min read

The **Models** tab lists every All in One AI model, with the price of each one in credits. This is where you find the id to put in the `model` field of the API or in a tool's settings.

Searching for a model

1. Open All in One AI and the **Models** tab.
2. Choose the type: All, Text, Image, Video or Audio. Next to each one is how many models there are.
3. Type in the "Search by name or id" box, for example `kimi` or `text-to-video`, and click **Search**. The search also looks at the category and the description.

What each row shows

Column	What it has
Model	The name, the id and a short description of what the model is good at.
Type	Text, Image, Video or Audio. For text models, the context in tokens; for the others, the category, such as `text-to-image`.
Price	For text models, input and output in credits per 1 million tokens. For the others, credits per image, per second or per generation.
Buttons	**Copy the id** and **Try it**.

Copying the id and trying the model

Copy the id puts the id on your clipboard. Paste it into the `model` field of the API, your tool's settings or `--model` in the `aio` command. That way there are no typing mistakes, such as a swapped letter or a missing slash.

Try it opens the Playground with that model already chosen, on the right tab: Chat, Image, Video or Voice. Models that need a file the Playground does not send have no such button: use them through the API.

The same list through the API and in the terminal

```
curl "https://api.mozout.co.mz/v1/models?type=text&q=kimi" -H "Authorization: Bearer $MOZOUT_API_KEY"
aio models --type text --search kimi
```

Your agents do not appear on the Models tab: they are on the Agents tab. Through the API they come first in the list, with the id `agent/...` and the type `agent`.

Choosing between several text models? See **the price, the context and what each one is for**.

RECOMMENDED

Find the model and copy its id on the Models tab.
