What Cline spends: the History tab and a key just for Cline

Cline & Roo Code Created on **November 28, 2026** 2 min read

Cline asks for prices in Model Configuration, but those numbers stay in Cline. Our API sends back the tokens of each answer, not the credits. What you really spent is in your All in One AI History.

The prices in Model Configuration

Cline's documentation lists Input Price and Output Price in Model Configuration. MozOut does not receive those fields and they do not change what you pay. Each model's real price is in credits per million tokens, on the **Models tab** and in the `pricing` field of `GET /v1/models`.

A key just for Cline

History separates requests by key, using the name you gave the key in the **API Center**. Create a key named "Cline", with only `ai:read` and `ai:write`, and use it only in Cline. Requests from your other programs stay out, and if you need to cut its access, you revoke just this key.

What History shows

Where	What you see
The list	Each request, with the date, model, type, key, mode (Sandbox or Production), tokens, credits and status.
The details	The input, output and cached tokens, the credits spent and the request's Correlation ID.
The summaries	The requests, credits spent, models and keys used in the period, with bars by model and by key.
Export CSV	The filtered requests in a file you can open in a spreadsheet.

Seeing only Cline

1. Open the **History** tab of All in One AI.
2. In the **Key** filter, choose the "Cline" key. In **Mode**, choose **Production**.
3. Pick the dates and click **Filter**.
4. To keep or add up the figures, click **Export CSV**.

MCP server requests

If Cline uses the MCP server with the same key, image, video and voice generations and questions to other models also show in History. Each tool call counts towards the key's request limit. With the Coding Plan, the points left are on the **Plan tab**.

To spend less: short tasks, a cheap model for simple work and the maximum output at 16,000. See **how to lower the maximum output**.

RECOMMENDED

Want to keep track of what Cline spends? Visit the Coding with AI page.
